Reasons for Allowance

Claims 1-50 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Crasft et al., taken alone or in combination of other references, does not teach or fairly suggest a programmable logic device (PLD) comprising, among other things, that wherein the configuration circuitry is configured to program a function of the programmable logic device without using an input buffer to store the configuration data before processing of the configuration data by the configuration circuitry (claim 1); wherein the function of the programmable logic device (PLD) is programmed without stalling the configuration device (claim 9); wherein the programmable logic device (PLD) is configured to be programmed without using a buffer to store the serial configuration data before processing of the configuration data by the data converter circuit (claim 21); means for receiving serial, compressed configuration data from a configuration device without stalling the configuration device (claim 33); and receiving serial configuration data by using a configuration circuit that is configured to program a function of the programmable logic device (PLD) without using an input buffer to store the configuration data before processing by the configuration circuit, wherein the serial configuration data is adapted to configure a function of the programmable logic device (PLD)(claim 41), as set forth in the claims.
